The basic concepts of seismic retrofit engineering are simple and available on this website. Let's say a seismic retrofit engineer recommends bracing posts that hold your floor up. As we shall see, if they recommend this, they do not understand basic retrofit engineering or what happens to houses in actual earthquakes.

Do I Need a Seismic Retrofit Engineer for my Earthquake ...

Basic concepts of the earthquake engineering, implemented in the major building codes, assume that a building should survive a rare, very severe earthquake by sustaining significant damage but without globally collapsing. On the other hand, it should remain operational for more frequent, but less severe seismic events.
