[PDF] BISQ Questionnaire for Infant Sleep Assessment ...

The BISQ was created based on literature review of the infants sleep, primarily searching significant variables in clinical studies that used subjective and objective measures of the sleep. The administration time of the questionnaire is 5 to 10 minutes and questions are related to the last week sleep periods of the infant (11). The criteria used to define poor sleepers on the basis of the BISQ measures are as follows: 1) the child wakes > 3 times per night; 2) nocturnal wakefulness period ...

Sleep Science - BISQ Questionnaire for Infant Sleep ...
