Understanding Dust Explosion Prevention & Protection Dust explosions are unpredictable as they are dangerous. They are a unique and complex phenomenon, i.e. you can't find two explosions that share the same characteristics. The five main elements in the Dust Explosion Pentagon include:

Dust Hazard Analysis - Explosion Prevention & Protection

Early detection measures combined with explosion or fire protection systems provide a total solution for combustible dust hazards. Our explosion protection engineers specialize in integrated design and have partnered with Firefly, the global leaders in prevention systems. CV Technology is the global leader in explosion and fire protection systems. Our goal is to keep your plant safe and operating.
