Animacy (antonym: inanimacy) is a grammatical and semantic feature, existing in some languages, expressing how sentient or alive the referent of a noun is. Widely expressed, animacy is one of the most elementary principles in languages around the globe and is a distinction acquired as early as six months of age.

For example, species names are routinely given in the genitive case in Latin, and indeed it is a prescriptive rule about the coining of a new species name that it be placed in genitive case. The underlying deep motivation is presumably that species are part of a genus, so that when one expresses a species name it is shorthand for a more ...

In Unraveling the Intent, the Buddha gives a systematic overview of his three great cycles of teachings, which he refers to in this text as the “three Dharma wheels” (tridharmacakra). In the process of delineating the meaning of these doctrines, the Buddha unravels several difficult points regarding the ultimate and relative truths, the nature of reality, and the contemplative methods ...
