Getting Started Guide Surveying Equipment

What equipment is needed to conduct a survey? To get started in surveying you need a theodolite and a level (sight level, laser level or water level). A theodolite is considered as the ultimate surveying too. It is used to measure vertical and horizontal angles between points. Having the right survey equipment ensures accurate and reliable results.

How Does Land Surveying Work? The Process and the tools ...

Before choosing personnel and selecting survey equipment, it is important to determine the accuracy required for the job. Cut and fill slopes and ditches, for example, don't require the same accuracy as drain inlets and finished pavement grades. No survey measurement is ever exact. Surveys are subject to error, so always check your work.
