Display texts in preview using dispmanx overlay ... - GitHub

Recordbuf. recordbuf is a parameter which controls how many past keyframes should be included at the start of a recording. For example, recordbuf=1 means that a recording will start from the last keyframe, and recordbuf=2 means that a recording will start from the second last keyframe relative to when hooks/start_record is created. The minimum value of recordbuf is 1.

picam by iizukanao

The simplest approach is to set up a brand new audio stream originating from the machine currently receiving your audio/video stream. If you've already got a working picam command string it shouldn't be too complicated to yank bits out of it for running audio only. – goobering Apr 2 '17 at 11:56

Raspberry Pi Live Streaming using Picam [Audio+Video]

The secret sauce here is that instead of using the standard Python camera software, I use a project called picam. picam offers audio/video recording for the Raspberry Pi. Head on over to their github page and check it out. I was pleasantly surprised to find that there's a library that can do this. I had heard about lots of hacky ways to record ...

The next challenge is to combine the video file and the audio file. I have not tried this with the Raspi, but OpenShot will allow you to import the two files and move the audio backwards and forwards in time until in sync with the video. Don't forget, if you want to view mp4 files on the Raspi, you will need a licence.

how can i record a lecture with audio and video ...

Introduction. Learn how to connect the Raspberry Pi Camera Module to your Raspberry Pi and take pictures, record video, and apply image effects.

Getting started with the Camera Module - Introduction ...
The HLS video part works on my desktop with Linux/Chromium and my Android/Chrome phone. I am also able to get the HLS video to work on a MacBook (10.13.3) with Chrome. However, my real problem is that I am unable to get the HLS video to work on any iOS mobile device, specifically iOS versions 10.3.3 and 11.2.5.

android - Unsupported HLS video on iOS mobile - Stack Overflow
Our mission is to put the power of computing and digital making into the hands of people all over the world. We do this so that more people are able to harness the power of computing and digital technologies for work, to solve problems that matter to them, and to express themselves creatively.

Teach, Learn, and Make with Raspberry Pi – Raspberry Pi
The easiest solution however appeares to be the program picam that directly combines video and audio. It offers good support for a lot of streaming possibilities. It offers good support for a lot of streaming possibilities.
