Hi Guys, My machine is dying on me so need to put PB11 on a new machine. I have an upgrade license and generated a new key. I'm not having luck when loading a new license key. Maybe because I generated an alternate license or do I need to install PB10.5 before I can install since it's an upgrade version? Anyone remember any of this stuff. Thanks ...

Unfortunately, PB 12.5.x and 12.6 were not W10 compliant releases of PowerBuilder. Appeon PB 2017 was the first W10 compliant release. The only think I can think of that might get you through the W10 install using PB 12.5.x is to try booting up W10 in "Safe Mode" and then run the installation again and see if that works.
