The VIN code is the vehicle identification number, which is a unique serial number. It is used to identify trucks around the world. Decryption of VIN, especially if it's a free option is a very important thing for a modern driver. To find out the characteristics of the car, if there are several variants of models is quite problematic.

If the serial number on the data plate has a "-1" suffix after the number, then it's a so-called '61, if it has a "-2" suffix, then it's a so-called '62. If the engine is original, then the info on the data plate will id the motor by "horsepower", ya can compare that info with what ya see in this data sheet.

Engine Identification???? | IH PARTS AMERICA

The medium-duty 1930 A-series trucks received the all-new 278.7 cu in (4.6 L) FB-3 six-cylinder engine, with overhead valves and seven main bearings. This was complemented by larger versions of the same engine and was built until late 1940 (as the FBB), [7] the line-up being expanded downward by the smaller FA-series (later FAB) in 1933.
