Introduction To Special Relativity Robert

Robert Resnick promotes special relativity in his 1967 book "Introduction to Special Relativity". Starting on page 53 discussing clock synchronization, figure 2-1 illustrates simultaneous lightning strikes in two frames, one resting and the other moving. Signal motion in the rest frame is ballistic while in the moving frame it is absolute.

It's a clear, patient, matter-of-fact introduction to the subject which takes the time to clarify many of the obscure and seemingly contradictory aspects of special relativity. It's written about at the level of the famous Halliday and Resnick university physics books. I found the book to be very useful as an introduction.

"Special Relativity: An Introduction with 200 Problems and Solutions" by Michael Tsampanlis covers a lot of stuff and goes in depth. It can also be used as a "SR cookbook", because if you need some SR formula, you will probably find it there. If not, then you probably won't find it easily in some other SR textbook.

Special relativity indicates that, for an observer in an inertial frame of reference, a clock that is moving relative to them will be measured to tick slower than a clock that is at rest in their frame of reference.This case is sometimes called special relativistic time dilation. The faster the relative velocity, the greater the time dilation between one another, with the rate of time reaching ...
