Memento Mori Muriel Spark

The blurb on the back of my paperback copy by Stephen Schiff of the New Yorker calls Memento Mori "A complex, beautiful, and terrifyingly insightful novel about old age." This is spot on! I was surprised to see that Muriel Spark was only 41 when she penned this because it seems to really get at the heart of being in your seventies and eighties.

Book review: "Memento Mori" by Muriel Spark | Patrick T ...

One of the many delights of a Muriel Spark novel is the way in which the ground shifts so delicately under the reader's feet. Memento Mori begins as a mystery: who is victimising elderly people by making anonymous phone calls suggesting that they remember they must die? A detective is consulted, and duly tries to identify the culprit; or culprits, as there is little consensus on precisely what kind of voice is at the end of the line.

Memento Mori is one of Spark's best novels precisely because of how much is held in perfect balance: play and seriousness, entertainment and challenge, readable plot and postmodern derailment. Unforgettably astounding and a joy to read, *Memento Mori* is considered by many to be the greatest novel by the wizardly Dame Muriel Spark. In late 1950s London, something uncanny besets a group of elderly friends: an insinuating voice on the telephone informs each, "Remember you must die."

Memento Mori is another winner, all the moreso because the main characters (who are really characters) ar over 70. Spark is a master at depicting a particularly brittle segment of English society, that of the upper class at the edge of the way down and the middle class at the edge of the way up. And she does it with such wit and dark humor.
