Plantation Crops

A plantation is a large-scale estate meant for farming that specializes in cash crops.The crops that are grown include cotton, coffee, tea, cocoa, sugar cane, opium, sisal, oil seeds, oil palms, fruits, rubber trees and forest trees. Protectionist policies and natural comparative advantage have sometimes contributed to determining where plantations are located.

Plantation - Wikipedia

Tobacco and cotton proved to be exceptionally profitable. Because these crops required large areas of land, the plantations grew in size, and in turn, more slaves were required to work on the plantations. This sharpened class divisions, as a small number of people owned larger and larger plantations.

Horticulture :: Plantation Crops

The typical plantation was a self-sustained community, an economic and political institution governed with a monopoly of authority by the planter. Plantation crops were determined by soil and climate, with tobacco, cotton, rice, indigo, and sugarcane, for example, each predominating in a certain zone of the southeastern colonies of North America. The labour-intensive plantation declined abruptly in the United States with the abolition of slavery.
