### Web 2 0 Semantic Web

There are differences, of course: Semantic Web is like Web 2.0 (in this respect) but with more general, standardized, and possibly more expressive data models. In some cases problem may get really hard and needs inferences, reasoning services; but Web 2.0 will be able to seamlessly "upshift" to RDF Schemas, SKOS, OWL, or Rules, making use of the greater expressibility of those technologies.

### Talking Points for Semantic Web vs. Web2.0

Where Web 2.0 is focused on people, the Semantic Web is focused on machines. The Web requires a human operator, using computer systems to perform the tasks required to find, search and aggregate its information. It's impossible for a computer to do these tasks without human guidance because Web pages are specifically designed for human readers.

### What Is the Semantic Web? - Webopedia.com

Tim O'Reilly, who coined the term Web 2.0 proposed a long-term vision of the Semantic Web as a web of data, where sophisticated applications manipulate the data web. The data web transforms the Web from a distributed file system into a distributed database system.

### Semantic Web - Wikipedia

Web 2. 0 has gradually evolved from letting the Web users play a more active role. Unlike the initial version of the Web, where the users mainly "consumed" content, users are now offered easy-to-use services for content production and publication.

### Web 2.0 & Semantic Web eBook by - 9781441912190 | Rakuten ...

Web 2.0 Is an Interactive Internet These ideas of bringing the power of people directly into the internet wouldn't be possible without the technology to support it. For the collective knowledge of people to be harnessed, websites must be easy enough to use that they don't stand in the way of people using the internet to share their knowledge.

### What Is Web 2.0 and How Has It Changed the Internet?

Web 2.0 is a term for today's interactive Internet. It is often contrasted with Web 1.0, the earlier Internet of the 1990s, and a future theoretical Web 3.0 which involves additional advanced technologies to enhance how we will likely use the web decades from now. Techopedia explains Web 2.0  
Web 1.0
